

Company Profile

Toolnet Oy was founded in 2004, but the professionals of the company have been in wholesale and importing business since 1980's. Company's growth has been significant and Toolnet Elektro was founded in 2009. Toolnet Oy is concentrating on hardware business which includes categories like hand tools, protective equipment, compressed air products, painting and measuring tools. Toolnet Elektro focuses on the electronics, LED and energy saving products, work lights, fans, battery chargers and welding equipment just to name a few. Total amount of the different products is close to 4000.

In 2010, we expanded to the Estonian market. We set up our own company in Estonia which is called Toolestnet OÜ. We have sales to Sweden and Lithuania as well.

The corporation is owned by its management. The budgeted turnover for the year 2017 is around 10 million EUR which will be achieved by 14 highly professional staff members.

The main customers are department stores, hardware stores, construction companies and supermarkets.

The company is located in the capital of Finland, near the Port of Helsinki and Helsinki-Vantaa international airport. Office and showroom are spacy, covering together 400sqm. Our warehouse is located close to the office and it covers 4000sqm with the capacity of around 4000 pallets.

Most of the products are made in the North and South Asia but we have also wide range of products from USA and EU countries. We have always some Finnish made products on our product range.

We are positive that our services will satisfy our customers and suppliers demands now and in the future. Our goal is to constantly improve the quality of our products and services and to create added value for our partners. We are always searching for new suppliers into mutually beneficial long-term relationship.

Our company is a member of Helsinki Chamber of Commerce.
